

Requirements:

Salesforce

(Pro, Ent, Unlimited, Dev)

Microsoft Dynamics GP

(9.x, 10.x)

eConnect

Hardware:

1 GHz CPU

1 GB RAM

200 MB free hard disk

KEY BENEFITS

- Improve productivity by reducing double data entry
- Increase data visibility across multiple systems
- Reduced A/R by automating payments, reports, workflows and alerts
- Integrate with other applications like eCommerce to simplify business

Are you tired of reconciling between Opportunity and Invoices sent from Microsoft Dynamics GP?

- DBSync for Salesforce.com & Microsoft Dynamics GP provides an easy to use application to synchronize Accounts, Contacts, Products, and Opportunities to GreatPlains Customer, Sales Order Processing (SOP), Receivables (RM), Items, Invoicing Transactions and many more.
- Track Cash to Close and AR analytics to manage your customers more effectively.
- The application provides a pre-built field map along with flexible mapping and configuration capability.
- No Coding required, pre-built templates for quick start

Data Flow

Microsoft Dynamics GP	Salesforce
Customer	Accounts
Customer	Contacts
Item, Price Lists	Products/PriceBook
Sales Order Processing (SOP)	Opportunity
Receivables (RM)	Opportunity
Any Object	Custom Objects

Features

- Convert Salesforce Opportunity Won to Invoice or SOP in GP
- Easily extend, map, and create new business processes and mappings
- Supports integration with custom objects in salesforce.com
- Supports Multiple Microsoft Dynamics GP Databases for multi-entity
- Migrate data from Microsoft Dynamics GP to Salesforce or vice-versa
- Run your application on-premise or on-demand

"DBSync is without a doubt the easiest and quickest Salesforce.com to Microsoft Dynamics GP integration tool to install"

Jonathan Millman, President of Shift CRM Inc
